

Mental Health Associate Program

APPENDIX A

Class Leader Guidelines

1. All students will be selecting a day where they will act as the leader of the group and lead the class discussion. The content of the discussion should include relevant situations occurring at your practicum site. For example:
 - What types of individuals are you working with?
 - What are you learning?
 - What is surprising you the most of what you are seeing?
 - What are some of your concerns?
 - Are there any particular traditions that your facility follows?

2. Please note that this is not a presentation; it is a class discussion. Your job is to start the dialog by presenting situations and theoretical concepts regarding your placement and encourage the rest of the group members to share similar concerns and experiences. The class discussion will run for one hour and fifteen minutes, with two presenters per class. Students will sign up for a day of their choice.

3. Please see your instructor if you should have any questions.
