

## Curriculum Mapping Examples: Montgomery College Library Tutorials & Credo Instruct Content

The MC Library's information literacy content allows you to easily pull learning objects directly into your Blackboard course to provide your students with crucial support in building the information literacy skills they need to be successful with academic assignments. We are offering both the librarian-created tutorials and quizzes you are used to, and a new series of tutorials and videos from Credo Instruct. You will be able to access all of these resources from the **For Faculty: Embed Library Instructional Content** link on the left menu of any Blackboard course site.

This document is intended as an example of how the available tutorials and videos could be mapped to the information literacy learning outcomes for a selection of courses. You are welcome to include this content in your courses in any way that you see fit. Need assistance? Visit the **Library Tutorials, Videos, and Quizzes** page to see all available content, instructions, and contact information.

Course	Learning Outcome	Information Literacy Content
BIOL 150	Organize information in the form of a scientific lab report	Credo Video: Synthesizing Information
	Find external resources that further explain and explore applications of the experiment you conducted	Credo Tutorial: Choosing & Using Keywords Credo Video: How to Read Scholarly Materials MC Library Tutorial: Use RaptorSearch to Find Articles, Books, & More
